

vcare with powerful Enterprise Vault-Team

Focus on international e-mail archiving-projects

München, 27.07.2009 vcare Infossystems expand their Enterprise Vault-Team. Nine consultants are now certified for Symantec Enterprise Vault 8.0. Hereby the company has the broadest team of specialists for email-archiving in Europe. Vcare concentrates on complex projects, locally as well as internationally.

vcare Infossystems today employ nine Enterprise Vault 8.0 specialists and is hereby the company with the most certified consultants in Europe. The company is the proven specialist for email-archiving. vcare focus on complex projects which are related to big migrations, locally as well as internationally.

„Our ten specialists have all their own core competences. Thereof we profit during the different customer projects,” explains Frauke Gross, Account Manager. „vcare supports the migration processes by own individual solutions. Our Enterprise Vault tools and the fundamental knowledge of our consultants are essential in order to realize successful and profit-making projects together with the customer,” according to Gross.

The EV-tools owned by vcare Infossystems are:

- Archive Shuttle – automated migration of EV archives
- EV Nearsync – replication of EV archives as Backup alternative
- Granular Restore – individual mail restore via Web Interface for the user
- PST Flightdeck – automated migration of PST-files in EV archives

The team is managed by Thomas Madsen, Managing Director Germany and Member of the Management Switzerland.
